

Closing Tool Repair and Loan

Wear and tear will take its toll on any tool. What is your company's plan when a closing tool needs to be repaired? Ask Pipeline Packaging to evaluate your closing tools. If a repair is required, send it to us. We can even loan a replacement to your packaging department while we work on yours.

Proper UN Pail Crimping

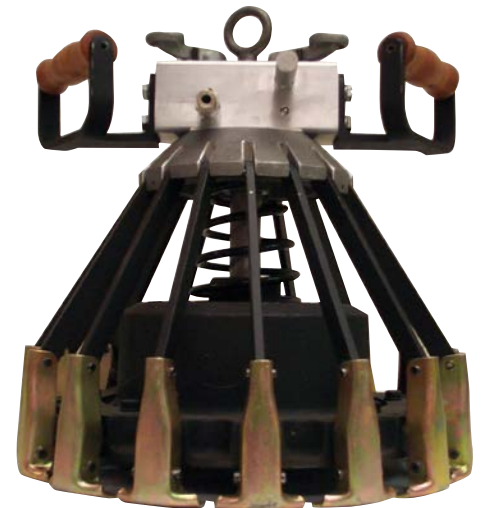

Closing Tool Repair and Loan

Pipeline can provide a wide variety of options for your closing tool. Please let us know your preferences so we can best assist you:

Performance	Size	Operation	Weight
High (20-24 gauge)	8 1/2"	Air (Pneumatic)	Light Weight
Standard (24-28 gauge)	11 1/4"	Manual	Standard
	14"		

Closing tools include heat treated, die formed jaws and hardened spring steel pivot pins. Each tool is fully adjustable in both the open and closed positions to accomplish high quality closures. Pneumatic tools are readily adaptable to counter-balance or spring suspension systems, reducing operator fatigue.
