We are...

Our people, the foundation of our business, take a genuine interest in serving our customers and meeting their unique packaging needs. We are resourceful, customer-centric and competitive from strategy through fulfillment. As a partner to our customers, we provide knowledge, communication, efficiency and depth of resources that are critical to their business operations.

Together we share a common goal — to create solutions that drive customer success.

“

Pipeline has offered us excellent service and fair pricing. Their staff is both friendly and knowledgeable, which makes our business a pleasure. ”

Why “Pipeline” Packaging

A “pipeline” is a channel that moves resources and information from impractical locations to places where they can readily be used. Through services, products, expert advisory and innovation, Pipeline Packaging will be that channel towards your company’s success.

An Employee Owned Company

Offering End to End Packaging Solutions

PACKAGING...

- Protects your product, advises the consumer and promotes your brand.
- Comes in a variety of colors, shapes, sizes and materials to safely hold your product and catch the eye.
- Announces to the world that your product is here.

Good People at the Core of Packaging

With 25+ years of experience, we understand that people make products, services, companies and brands successful. Let our proactive approach, timely communication and genuine concern for your success be a part of a winning strategy for you and your company.

You have a lot to manage in your pipeline. Let our ***Good People at the Core*** be the pipeline to your success!

Pipeline Packaging can help provide the right choice of industrial or commercial packaging for your product. Our value-added Core Services — such as warehousing or direct ship options, modifications to existing packaging, custom molds, testing and more — provide you with more and better cost-effective options.

Looking for the perfect package for your personal care product? Pipelines's large selection of high-quality jars and bottles can help your brand take shape. Not only do we have an extensive selection of mold available items, many of the PET items are stocked on the floor and are available for immediate shipment.

While many product lines in this offering were created specifically for the personal care market, you'll find them perfectly suited for the healthcare and household markets as well. Whatever your distinct need, you'll be satisfied with our high-quality resins, state-of-the-art processing techniques, in-house decorating and quality assurance programs.

CLOSURES, SIFTERS & FITMENTS

Critical to every package is how it is sealed — and we can seal it for you.

Pipeline specializes in both single and multi-piece dispensing and non-dispensing closures and fitments for the food and spice markets. We're also quite proud of our ability to manufacture custom, injection-molded plastic closures and related components to the most detailed, exacting standards and offer you complete packaging options.

Companies turn to Pipeline for our expertise and innovation in meeting their packaging needs. From a simple twist-off plastic closure to custom fitments and sifters — our goal is not only to make your product stand out — but to save you time, money and of course, increase your bottom line. That's why the design and technology engineers at Pipeline are continuously working to develop new and exciting packaging in addition to making current packaging better.

Of course, we're not just bottles.

DECORATION SERVICES

What decoration do you have in mind?

From bottle design to decoration — we'll make sure your brand gets noticed. Differentiate your stock or custom bottle with high impact decoration. Our engineers are particularly adept at handling difficult to decorate containers as well as combining multiple types of decoration.

- Direct Screen Printing
- Pressure Sensitive Labeling
- Heat Transfer Labeling
- Shrink Sleeve
- Stretch Sleeve
- In-Mold Labeling
- Pad Printing on Closures

CREATIVE DESIGN SERVICES

At Pipeline Packaging, we provide a cost-effective, collaborative, design approach for innovative total packaging solutions. We offer speed to market with a full range of in-house value added services. With our extensive creative capabilities, we can drive concept development, from initial sketches to commercial bottles.

Great design begins with thorough research.

The consumer packaged goods market is constantly evolving, which is why you need anytime access to the latest consumer trends, product innovation, market sizing and strategic insight. We monitor trends from around the world to understand what is driving your customers next purchase decision. We incorporate what we learn into our design process in order to give your product differentiation in a competitive market place.

GLOBAL TREND
RESEARCH

SHAPING FRESH
APPROACHES

Our in-depth trend analysis is just the start of the design process.

There are a few key things that we take into consideration in the design of any package - environmental considerations, shelf appeal, performance & manufacturability of package. Material selection, weight reduction, and cube optimization are all factors that we consider as we look to provide a sustainable solution. When it comes to shelf appeal, we work to design concepts that will stand out amongst the competition. From color selection, to shape and labeling, many things help contribute to a products differentiation.

Not only does a package have to look great and appeal to customers, it has to perform. Ergonomics and user-friendliness along with functionality and stability are all considered in our initial design ideations.

CAPTURING THE POSSIBILITIES

One thing we won't do is design a package that is not manufacturable. We make sure that things like top fill, assembly, filling and decorating are all taken into the overall design of a package. We want to make sure that once we have worked with you to develop the concept, the package can go into production with out any roadblocks.

Conceptualizing and sketching are key elements in the creative design process. Our goal is to collaboratively create new customer inspired package designs so that you can rapidly move into the next stage of development. These sketches and concepts reflect current market and innovative next generation trends that can be reviewed and evaluated by your team.

From a dimensionally correct digital file, Pipeline Packaging can create an FDM model using one of our in-house 3-D printers. This will give you a full size representation of your product that you can touch and feel.

ENGINEERING THE DETAILS

Good People at the Core

Pipeline Packaging Creative Design Services personnel continually evaluate current in-market and cutting edge technologies. Take advantage of our highly trained professionals who are available to support your packaging projects with their technical expertise.

Our resources are focused on delivering rapid-to-market, cost effective, innovative packaging solutions.

SAMPLES

We have **hundreds of samples** of our bottles available for you, created in many materials, shapes and designs. You can choose from over 700 standard and specialty items. We will supply up to 24 samples per bottle type. Just let your Pipeline representative know what you'd like.

BOTTLE VARIETY

Resin	PET, PP, HDPE, LDPE, PETG, PS, PVC, PCR
Size	23cc to 2.25 gal
Color	White, Natural
Process	Injection Stretch Blow : 1-Step & 2-Step, Extrusion Blow : Shuttle & BDS*, Injection, Injection Blow, Multilayer, Post-Consumer Regrind, Co-Extrusion, Window Stripe, Vertical Stripe
Markets	Food, Liquor/Tobacco, Personal Care, Automotive, Specialty Beverage, Healthcare, Household/Industrial Chemical, Ag-Chem
Shape	Round, Oval, Oblong, Square, Tottle

SPECIALTY ITEMS

Gloss, Co-Extrusion, Bilayer, Grip Tight, Soft Touch

DECORATION

Silkscreen, Pressure Sensitive, Shrink Sleeve, In-Mold Label, Heat Transfer
