

PRODUCT DESCRIPTION: The form-fit, round-bottom shape of the F55/40-10-01 minimizes wrinkles and folds, thus reducing stress that often tears flat-seam designs and allows complete recovery of valuable product from 55-gallon drums. Ultra-thick, 10-mil film provides a super-strong, contoured fit. The liner is designed for easy installation and can be simply twisted and tied off to protect contents. Its flexible, heat-sealed construction is uniformly liquid tight.
